**Describe your Drinking-Water System.**

The Arnprior Water Filtration Plant (WFP) is owned and operated by the Corporation of the Town of Arnprior. The WFP is situated at 71 James St. Arnprior Ontario, plant operators can be reached at 613-623-4231 Ext 1809. Certified operators monitor and control the treatment and testing of water production and quality.

Water is pumped from the Madawaska River to the treatment plant where Coagulant and Polymer are added as a flocculent. The water is then put through a clarification process called an Actiflo system, where microsand is utilized to enhance flocculation and acts as a ballast to aid in settling solids. The water is then filtered; Chlorine, Fluoride, Phosphoric Acid and Soda Ash are added to prepare the water for consumption. The treated water is stored in two 2,200 m<sup>3</sup> reservoirs, Aqueous Ammonia is added, the treated water is then pumped to the distribution system, as well as a 2,700 m<sup>3</sup> elevated water storage tank.

**List all water treatment chemicals used over this reporting period.**
