

CONGRATULATIONS ARNPRIOR

We have a waste diversion rate of 25%!!!

What does this mean?

In 2008, the residents of Arnprior, collectively and as a community diverted 25% of our overall waste through recycling programs.

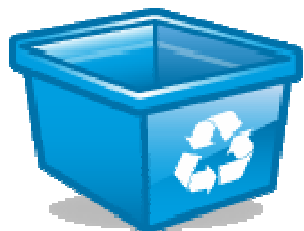

How did we do this?

- We recycled 602 tonnes of cardboard, paper, magazines, plastic, glass, Styrofoam, aluminum, waxboard, etc. through the curbside recycling program
- We recycled 14,320 lbs. of electronic waste
- We recycled 835 tonnes of organic waste (Leaf & Yard waste)
- We recycled 4.6 tonnes of tires
- We recycled 27.66 tonnes of scrap metal
- We reduced our garbage collection schedule and bag limit
- We used backyard composters to reuse waste organic material.

How can we beat a 25% waste diversion rate for 2009?

- Continue to reduce, reuse and recycle your household products
- Challenge your family to only generate ONE bag of garbage per week
- Put out more blue boxes, backyard compost and grasscycle
- Review the materials accepted in the Town's recycling program
- Encourage others to reduce, reuse and participate in the curbside recycling program
- Check the Town's website to review available waste diversion programs in your area

ARNPRIOR LET'S DIVERT 30% IN 2009!
