March 8, 2010

**Arnprior Emergency Siren will sound Saturday March 13th**

On Saturday March 13th at approximately 6 P.M. the emergency siren located at the Arnprior Fire/Police facility on Meehan Street will be tested.

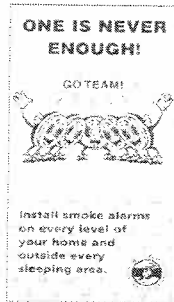

The siren is tested in the spring and fall, around the time that clocks are changed. Before going to bed on Saturday March 13th, clocks move ahead one hour. The Arnprior fire department uses this opportunity to remind residents to test all smoke alarms and change the batteries in all battery operated smoke alarms as necessary.

**Let the sounding of the siren serve as your reminder to change your clocks and change your smoke alarm battery.**
